

Maritime Home Medical Providers Association  
Association Des Distributeurs Medicaux Des Maritimes

June 1, 2022

Dear Potential Member;

It is our pleasure to invite you to join the Maritime Home Medical Providers Association (MHMPA). MHMPA was formed in April 2019 to act as a **“collective voice”** for the home medical equipment providers in the Maritime Provinces. Our members consist of home medical equipment providers along with our valued supplier partners.

We strongly believe that strength in numbers is the best way to achieve our common goals:

- To inform our members of current activities, regulations and trends and act in their collective best interest
- To educate government, health stakeholders and the public about the work we do
- To promote fair minded and responsible business practice
- To promote the employment of knowledgeable and well-trained professionals
- To promote the health and safety of the customers our member companies serve
- To promote optimum patient care and management
- To be a collective voice for the Home Medical Equipment Providers Community

Perhaps the most important thing that we have achieved since our inception is the opening of the lines of communication between our members in a very professional and welcoming manner.

As a valued member, each provider organization has a say in the direction of our association through a vote in the decision-making process (AGM). The membership fee for providers is \$1500.00 annually due each October 1<sup>st</sup>.

Included with this letter is a membership application and membership criteria. If you are interested, we request that you return your application to the address on this letterhead at your earliest convenience.

If you have any questions, please contact us at [info@mhmpa.ca](mailto:info@mhmpa.ca).

Sincerely,
